- You can add case studies and cite references
- You can add case studies for which you produce the text
- You will do a written interview and if you can't do one, you can record and interview and transcribe it.
- Remember to do whatever you can to make it easy for the individual ([Audio Generator](#))

The screenshot shows a web browser window with the URL `audiogenerator.com/default4.asp`. The browser's address bar and bookmarks are visible at the top. The website's main content area features a dark blue banner with three men's portraits on the left and the text: "Brand New! From Armand, Alex, and Rick AudioGenerator™ Boosts Sales by Breaking the Silence of the Web!". Below the banner is a navigation menu with buttons for "MEMBERS LOGIN", "AFFILIATE PROGRAM", "F.A.Q.", "RAVE REVIEWS", "10 SMART TIPS", "TEST DRIVE", "FREE TRIAL", "CUSTOMER CARE", and "ORDER NOW".

The central promotional text reads: "Your FREE TRIAL is Just :59 Seconds Away. Discover The Time-Proven Secret That Instantly BOOSTS Your Online Conversions, EXPLODES E-zine Subscription Lists And Sends Your Competitors Crying Home To Mommy!". Below this is a link: "Click Here if you are in a hurry to find out how." and another link: "Click Here for A Message from Armand Morin" with a red arrow icon.

Below the promotional text is an email preview with the following details:
Date: Tuesday, July 10, 2018
From: Armand Morin, Alex Mandossian and Rick Raddatz
RE: New Audio Technology Increases Website Pulling-Power

The email body text begins with "Dear Colleague," followed by "What if your Website could talk?" and "This Website not only talks, but the dozen or more messages you'll listen to were recorded by phone and took only a few seconds to upload!". It ends with "Sound crazy?".

At the bottom of the browser window, the Windows taskbar is visible, showing the search bar, taskbar icons, and system tray with the time 9:11 PM on 7/10/2018.

- ⊕ **How Virtual Reality Makes Life More Interesting**
 - Virtual Reality (VR) is exactly what it sounds like it is.
 - VR provides the opportunity to experience something that seems like a reality. It emulates things and experiences that happen in real life. The difference is that VR is not real life and it occurs in a virtual manner. It is helpful for those who desire to have experiences to which they do not have access. It is also helpful for experiences that may be dangerous.
- ⊖ **Examples of Virtual Reality**
 - ⊕
 - A common example is that of war games. Many mothers (and fathers) may not want to see their young sons and daughters join the military, but virtual reality gives these same kids (young adults) the opportunity to experience it. That experience can happen without the danger of injury or death.
 - Basically, VR gives the opportunity to experience a reality without the reality. This allows individuals to make a decision whether they want to follow that path in the real world.
 - Many people grew up watching a form of virtual reality on Star Trek. That is where they introduced the holodecks. The holodecks presented a full immersion virtual reality experience. It was also beyond its years in capability. Anything and everything seemed to fit within the scope of the holodeck. It could be a picnic by the edge of a lake from 400 years ago to a New York penthouse in the 1940s.
- ⊕ **More Discussion About Virtual Reality**
 - Virtual Reality allows one to be someone they are not. This is
